

ABSTRACT

- Refrigerated trolley for an aircraft.
- According to the invention:
 - each trolley (1) is equipped with a removable unit (11) that can be inserted in and removed from said trolley (1) as a single piece and that can produce cold inside the trolley, because said removable unit (11) has at least one controllable reversible solid/gas adsorption reactor containing a regeneratable adsorbent; and
 - means for regenerating said adsorbent are provided on the ground, outside said aircraft.
